Filigran Academy - Enterprise options

Tailored courses and practical training to elevate your expertise at every level.

DESCRIPTION

Filigran Academy is the all-in-one learning platform designed to help you master Filigran solutions, including OpenCTI and OpenBAS. Through structured courses, hands-on exercises, and official certifications, it provides an ideal learning path for both beginners and advanced users.

LEARNING PATH

Filigran Academy offers a structured, progressive learning path designed for different skill levels:

101 - Fundamentals
Covers the basics, including core concepts, interface navigation, and foundational workflows.

201 - Intermediate application
Focuses on real-world use cases, integrations with security tools, automation, and team collaboration.

301 - Advanced & certification preparation
Explores complex use cases, advanced configurations, custom development, and prepares learners for certification.

COURSE SERIES

A course series is a specialized training track focused on a specific use case or skill. Each purchase includes one year of access with continual course updates for the year. Complete the series, pass the final assessment, and earn a verified badge along with special prizes.

SUBSCRIPTION MODEL
